TECHNITRAN

IT Infrastructure | Data Center Support | Field Services

Cincinnati, Ohio · Midwest regional focus · National opportunities

PROFESSIONAL SUMMARY

IT professional with 10+ years of experience supporting banking, aviation manufacturing, and communications environments. Background includes technical support, device configuration, connectivity testing, hardware troubleshooting, inventory lifecycle workflows, and customer-facing service. Targeting Technical Support Lead, data center technician, deployment, and field-service opportunities.

CORE CAPABILITIES

Hardware diagnostics and break/fix · Network-device configuration · Connectivity testing · Endpoint and field support · IMAC workflows · Asset tracking and inventory control · RMA coordination · Incident documentation · Customer communication

PROFESSIONAL EXPERIENCE

Configuration Analyst II | Pyramid Consulting (W2 Consultant, embedded at Comcast Business)

August 2023 – December 2023

• Configured point-of-sale network devices and store equipment.

• Used internal and external ISP networks to access cloud-connect environments and test device connectivity.

• Modified in-house scripts for device connection testing and adjusted cellular modem configurations to meet provider requirements.

• Managed new and repaired inventory for redeployment; documented disposition of non-repairable and out-of-warranty equipment.

Configuration Analyst I | Pyramid Consulting (W2 Consultant)

August 2022 – December 2022

• Identified a cellular modem firmware-upgrade failure involving software/hardware behavior.

• The finding supported approval of a 2,000-unit RMA for further root-cause analysis by the manufacturer's engineering teams.

• Supported device configuration and troubleshooting workflows while maintaining consistent performance.

ADDITIONAL EXPERIENCE

10+ years across banking, aviation manufacturing, and communications environments. Add verified employer names, titles, dates, and detailed accomplishments for earlier roles before submitting this resume.
